# BenQ G2450 LCD Monitor

## An Advance in Layered Design

The GL50 series draws on a breakthrough design. Viewed from the front, the G2450 offers a cleanly sculpted countenance, while its backplate uses boldly terraced contours, effectively reducing any impression of bulkiness. The housing's sleek lines work in counterpoint to the crisply shaped oval base stand, creating a deft balance between contrasting visual elements—and conveying an incisive sense of rich layering.

## Senseye® Technology

Experience the truest colors of the world with the BenQ Senseye® Human Vision Technology. With the help of its six proprietary calibration techniques, Senseye® 3 delivers only the best viewing quality in each of its six pre-set viewing modes –Standard, Movie, Game, Photo, sRGB, and Eco – with the Eco Mode especially designed to save power and money.

## Full HD 1080p Visual Perfection

A full HD 1080p resolution means one thing and one thing only – the perfection of uncompressed, crystal clear images with 100% dot-to-dot viewing quality. The subtlest details are rendered to stand out with richer, more realistic colors, making your viewing experience even more absorbing.

## Win 7 compatible

The G2450 has passed Windows 7 certification and is fully compatible with Windows 7 color systems. Plug in the G2450 to your computer, and Windows 7 will recognize it instantly, making setup and connection effortless.
